User Interface Specification

1.   Introduction

This document specifies the user interface of the custom tool for managing multilingual data. The Language Manager tool will allow localizers to add and update translations of master data from English to all other supported languages.

2.   User Areas

The user interface modifications will affect solution developers.

3.   Functionality

The tool will provide the ability to upload and update translations from English to other installed languages. It will enable TeamConnect localizers to manage multilingual content by:
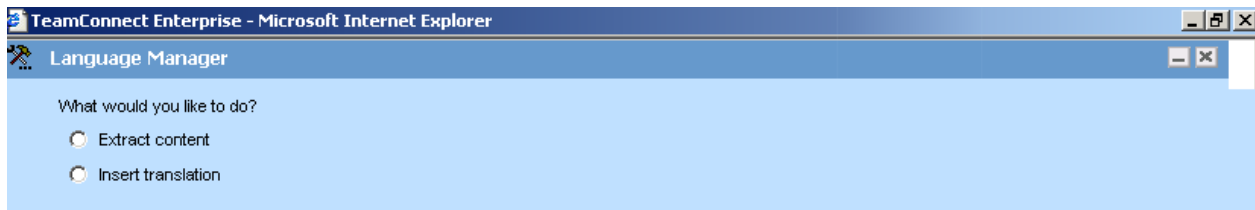

- Extracting the master data from a specific content area in all available languages in a form of an Excell (text) file ready for translation
- Insterting new or updated translated data back to the database

4.   Specific Requirements

4.1   Main Menu

The new "Language Manager" option will appear in the Tools drop-down list. When users select the option, the "Language Manager"screen will appear.

4.1.1   Initial Screen

…………….

6. Usability

6.1 Usability Goals

The Language Manager tool will facilitate translation and maintenance of master data in multiple languages. Users will be able to add ALL master data in a new language in a single click, as well as deliver ongoing language updates.

The usability of the tool can be further improved if recommendations in Section 8 are implemented.
